

NO TRASH FASHION

OUR FASHION STORY...

- We each buy 27kg of new clothes and textiles annually and $\frac{3}{4}$ of this ends up in our household garbage bins.
- 1 x cotton shirt = flushing a toilet 245 times.
- 1 x jeans = leaving the lights on all night.

WHEN SHOPPING...

- 1** Write a list: How long do you want it to last?
How much are you willing to spend?
- 2** Ask yourself if you can share or repair. The most sustainable clothes are the ones that we don't buy!
- 3** Check out the op shops, ebay and gumtree first.
- 4** Take your shopping list!
