Funded Projects 2016/2017

Sensory Concert

Artist - Grace Kim

The benefits of classical music in development of the brain are well documented. However, for the parents of children with sensory needs attending a live concert with their children can be a tremendous challenge and so these children are unable to benefit. This project specifically creates an environment for children's concentration and engagement by creating a 'sensory neutral' space and minimising external sensory stimulations, so that they will be able to naturally focus on the performance. In conjunction with relevant professionals this project will address issues such as: volume, lighting, temperature, size of space and number of people.

Breaking Bread

Artist - Margaret Davis

A communal theatre event in October 2017 based on particular memories of food with a team of Blue Mountains writers and performers, creating small scale productions to share with the community, initially at Wentworth Falls School of Arts. The collective experience spans three generations of professional theatre as actors, directors and writers. The project will emphasise the shared experience between performers, audience and the space in evocative spaces in the Mountains which lend themselves to simpler theatrical events, not involving expensive sets, costumes or technical effects.
